PROJECTS

Hitball(Game)

Aug 2016 - Oct 2016

https://github.com/harshit211997/Hitball

Hit the ball with the bat to keep it from falling, but it's not as simple as you think! The android game is built upon libgdx. The collisions and physics are hand crafted.

Blockks

May 2016 - Jul 2016

https://github.com/harshit211997/Blockks

It is a game where you have to make the stack of blocks by flinging one block over another. It is made on canvas(android) and uses no library or game engine. The physics components are hand crafted

Tic-tac-toe

Apr 2016 - Apr 2016

https://github.com/harshit211997/tic-tac-toe/

It is an easy to play, remake of classic tic-tac-toe game, with paper like feel. It uses basic components of android like image views, buttons, database, etc.
